

# EXPERIMENT 6

Vasanth B

240701820

## AIM:

The aim is to trial different app layouts and color schemes and evaluate user feedback on aesthetics and usability using GIMP.

## PROCEDURE:

### Step 1: Install GIMP

- Download and install from the official website.

### Step 2: Create a New Project

- Open GIMP
- Canvas Size: 1080 × 1920 pixels (standard mobile screen)

### Step 3: Base Layout Design

#### 1. Divide Sections:

- o Use Rectangle Select Tool to define Header, Content Area, and Footer.

Fill using Bucket Fill Tool with base colors.

#### 2. Add UI Elements:

- o Text Tool: For headings, button texts, and labels.

Tools: For buttons, input fields, image placeholders.

#### 3. Layer Organization:

- o Assign each UI component to a separate named layer:
  - Example: Header, Button Login, Text Title, Input Field Email

### Step 4: Create Colour Variants

#### 1. Duplicate Layouts:

- o Right-click on the project tab > Duplicate.

o Edit each with different colour schemes using Colorize Tool or Bucket Fill.

2. Save Layouts: o

File > Export As: ▪

Layout1.png

▪ Layout2.png

▪ Layout3.png

Step 5: Collecting User Feedback

Google Form Link:

<https://forms.gle/sxuuHVgaTmMWeRKv6>

Procedure:

- Shared all three layout images with users.

- Asked users to rate based on:

- o Visual appeal o

- Usability o

- Readability o

- Colour preference

User Feedback:

Layout 1:

- Simple layout with bold header and minimal UI •

Improve colour contrast

- Add button styling (e.g., shadow or depth) Layout 2:

- Improved hierarchy with vibrant colour palette

- Slightly cluttered background, tight spacing

- Increase spacing between sections

Layout 3:

- Clean, minimal, professional layout with consistent spacing •

Keep design as-is

- Possibly apply theme customization options in final product

Final Recommendation

Preferred Layout: Layout 3 Why?

- Clean and modern look
- Excellent usability
- Balanced colour scheme
- High user satisfaction in both function and form

Step 6: Iterate and Refine

1. Refine the Design:

- Based on the feedback, make necessary adjustments to the layout and color scheme. •

Experiment with additional variations if needed.

2. Final Testing:

- Conduct a final round of testing with the refined design to ensure usability and aesthetic satisfaction.
